

## **DESIGN INSTITUTE FOR EMERGENCY RELIEF SYSTEMS of the American Institute of Chemical Engineers**

---

Subject: License of SuperChems™ for DIERS Software

I am very pleased to announce the immediate availability for license of SuperChems™ for DIERS. Please visit our web site ([www.aiche.org/diers](http://www.aiche.org/diers)) to learn more about the capabilities of the computer program.

SuperChems™ for DIERS is an advanced software tool for pressure relief design. This new program incorporates the latest DIERS pressure relief design techniques and research findings.

This software is now available for a one-time License Acquisition fee of \$13,000 and an Annual License / Maintenance Subscription Program fee of \$2,200/yr.

The technology represented by the program is complex. Use of the program is therefore recommended for those skilled in the art and science of modeling and emergency relief system design.

With the above conditions and limitations, we look forward to providing SuperChems™ for DIERS.

Please contact me for information and to discuss purchasing and obtaining this program.

Very truly yours,

Harold G. Fisher  
Chair, DIERS
