Simplify compliance

Track, report, and present audits even easier and quicker than before

- Improved reporting capabilities
- Expanded prepackaged template options
- Added process safety survey analytics
- Multiple language support

Key features include:

- No special training required. Simple Microsoft® Excel® based, yet very powerful compliance and auditing tool.
- Visual, intuitive, quantitative and qualitative reports for presenting and compliance filing.
- Conduct multiple audits as a solo practitioner or work in a team. Ability to integrate entire teams' work to prepare comprehensive summaries with a few clicks.
- Track and report team work and participation.
- Track regulatory, local attention, compliance or RAGAGEP findings and analyze them with ease.
- Identify compliance gaps easily and track action items upon completion of audits.
- Track auditor's guidance and create appropriate action items to fill gaps.
- Create a history and log of audits for continuous improvement and compliance.
- Conduct Process Safety Survey of employees. Establish, improve and sustain process safety culture in the organization.
- Best practice templates in line with industry standards, protocols and guidelines, are prepared by Subject Matter Experts with multiple years of Compliance and Auditing experience.
