Subject: License of SuperChems™ for DIERS Computer Program

I am very pleased to announce the immediate availability for license of SuperChems for DIERS version 8. Please visit our web site (www.aiche.org/diers) to learn more about the capabilities of the computer program.

SuperChems for DIERS is an advanced software tool for pressure relief design. This new program incorporates the latest DIERS pressure relief design techniques and research findings.

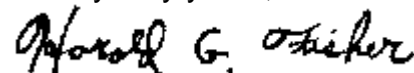

SuperChems for DIERS is now available for a one time License Acquisition fee of \$12,500 and an Annual License / Maintenance Subscription Program fee of \$2,000 / yr.

The technology represented by the program is complex. Use of the program is therefore recommended for those skilled in the art and science of modeling and emergency relief system design.

With the above conditions and limitations, we look forward to providing SuperChems for DIERS.

Please contact me for information and to discuss and to make arrangements to obtain this program.

Very truly yours,

Harold G. Fisher
Chair, DIERS
